034										

Here ID 034 is requesting Friday and Saturday as Annual Leave. The “Days” shows 1.5 correctly as it has already accounted for the fact ID 034 only works for Saturday AM even though “Session” is “Full Day”.

But the Planner has not accounted for that and displays the Full Day (in black) as Annual Leave.

It seems the Leave Application window accounts for the 1/2 work day automatically and doesn’t allow you to apply for AL if you’re not working. But the Planner doesn’t account for it and just displays 2 full days, even though it is actually 1.5 days.
